

PREDICTIVE ON-CHAIN INTELLIGENCE

Know what wallets *will do next.*

BlockSight predicts fraud, churn, and liquidity risk across chains, with explainable intelligence delivered through one API.

RAISING **\$1.5M.** \$500K COMMITTED BY PANTHER HOLLOW VENTURES.

Today, teams only see *what wallets have already done.*

On-chain activity is expensive to extract and slow to interpret. By the time a dashboard shows the change, users, liquidity, or capital have already moved.

RETENTION

Too late.

Churn becomes visible after engagement has already declined.

LIQUIDITY

42%

of launch-day yield farmers exit within 24 hours. 70% are gone by day three.

RISK

~\$14B

Left DeFi after two major hacks in April 2026.

ILLUSTRATIVE WALLET OUTPUT

● HIGH CHURN RISK

CHURN PROBABILITY

94%

Within the next 14 days

LIQUIDITY EXIT RISK

88%

Within 7 days

PREDICTION SIGNAL

High-value LP likely to churn and withdraw liquidity.

Matches the drop-off pattern of high-speed, cross-protocol wallets.

ACTIONABLE INTELLIGENCE

Deploy retention incentive within 24 hours.

Know what each wallet *is likely to do next.*

BlockSight converts multi-chain behavior into explainable predictions for churn, fraud, and liquidity risk.

INTELLIGENCE LAYER

ONE API. Wallet level predictions.

Scores update across multiple chains, providing actionable time to respond to emerging risk.

PREDICTION HORIZON: *UP TO 30 DAYS*

One intelligence layer. *Multiple markets.*

BlockSight starts with crypto applications and protocols, then expands the same wallet intelligence into adjacent financial markets.

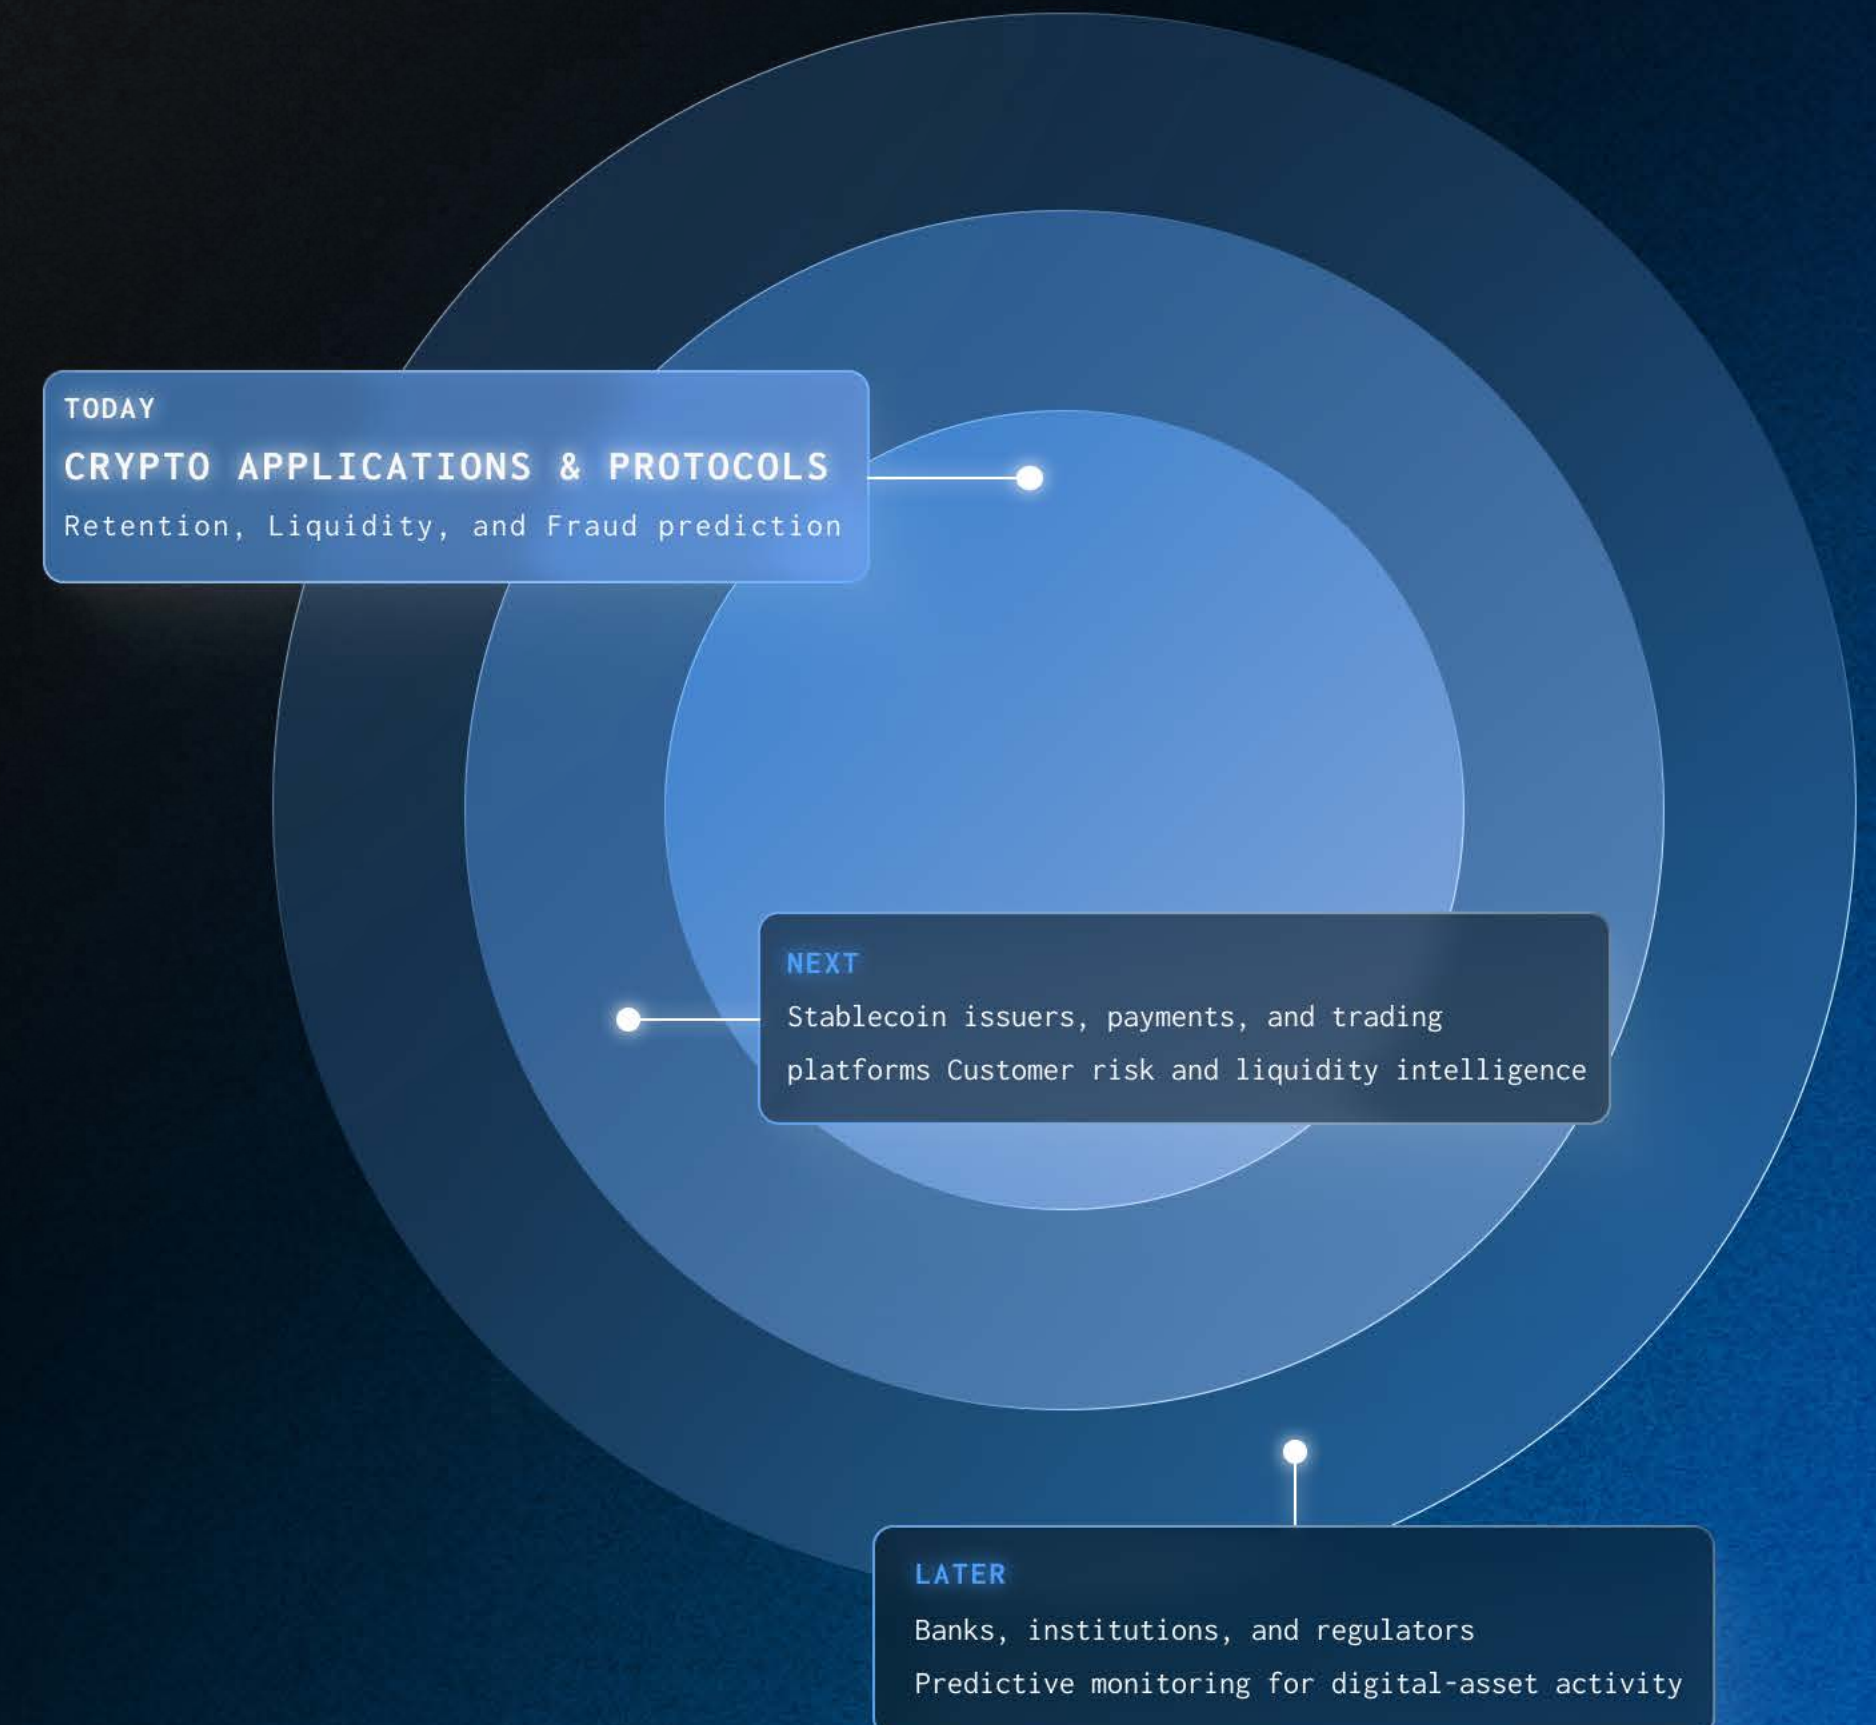

CURRENT FOCUS

APPLICATIONS AND PROTOCOLS.

Immediate demand for retention, liquidity, and fraud prediction.

EXPANSION PATH

The same wallet intelligence extends into adjacent financial markets.

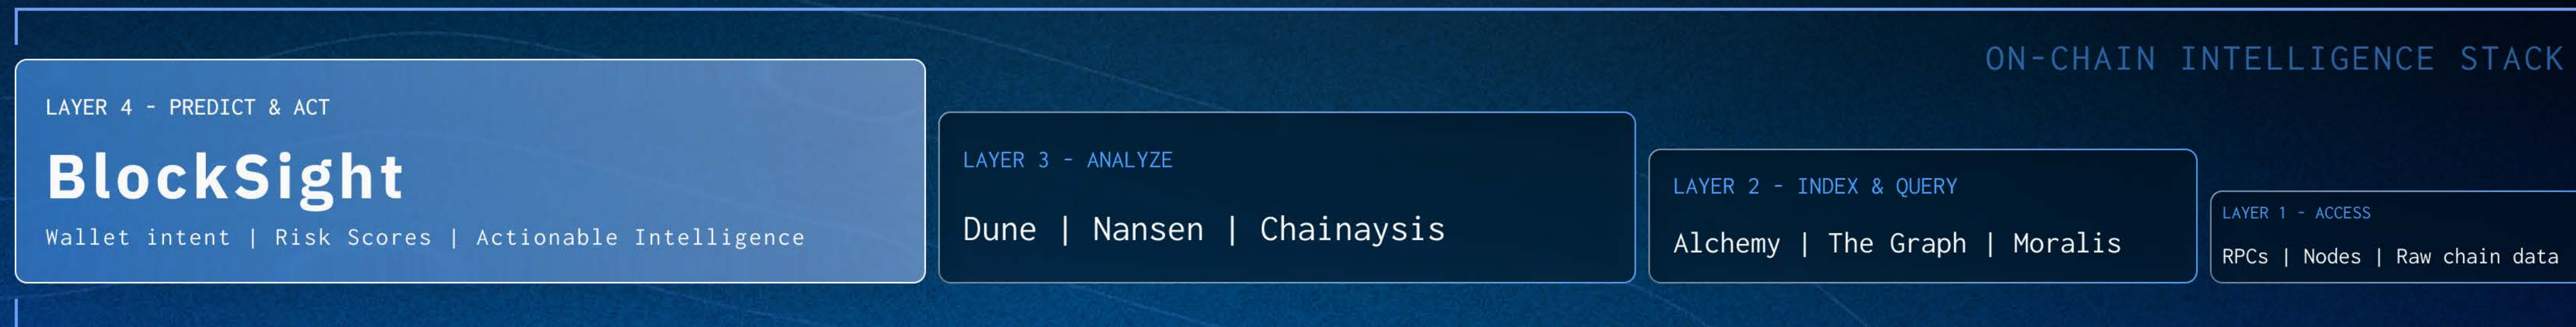

WE ARE BUILT DIFFERENT

Go beyond analysis.

Anticipate what happens next.

Existing tools help teams understand activity and detect risk.
BlockSight adds forward-looking wallet scores and Actionable intelligence.

TECHNICAL FOUNDATION

30+ years of NASA-funded research

SOLANA ECOSYSTEM

Proud member of Superteam Netherlands

INSTITUTIONAL VALIDATION

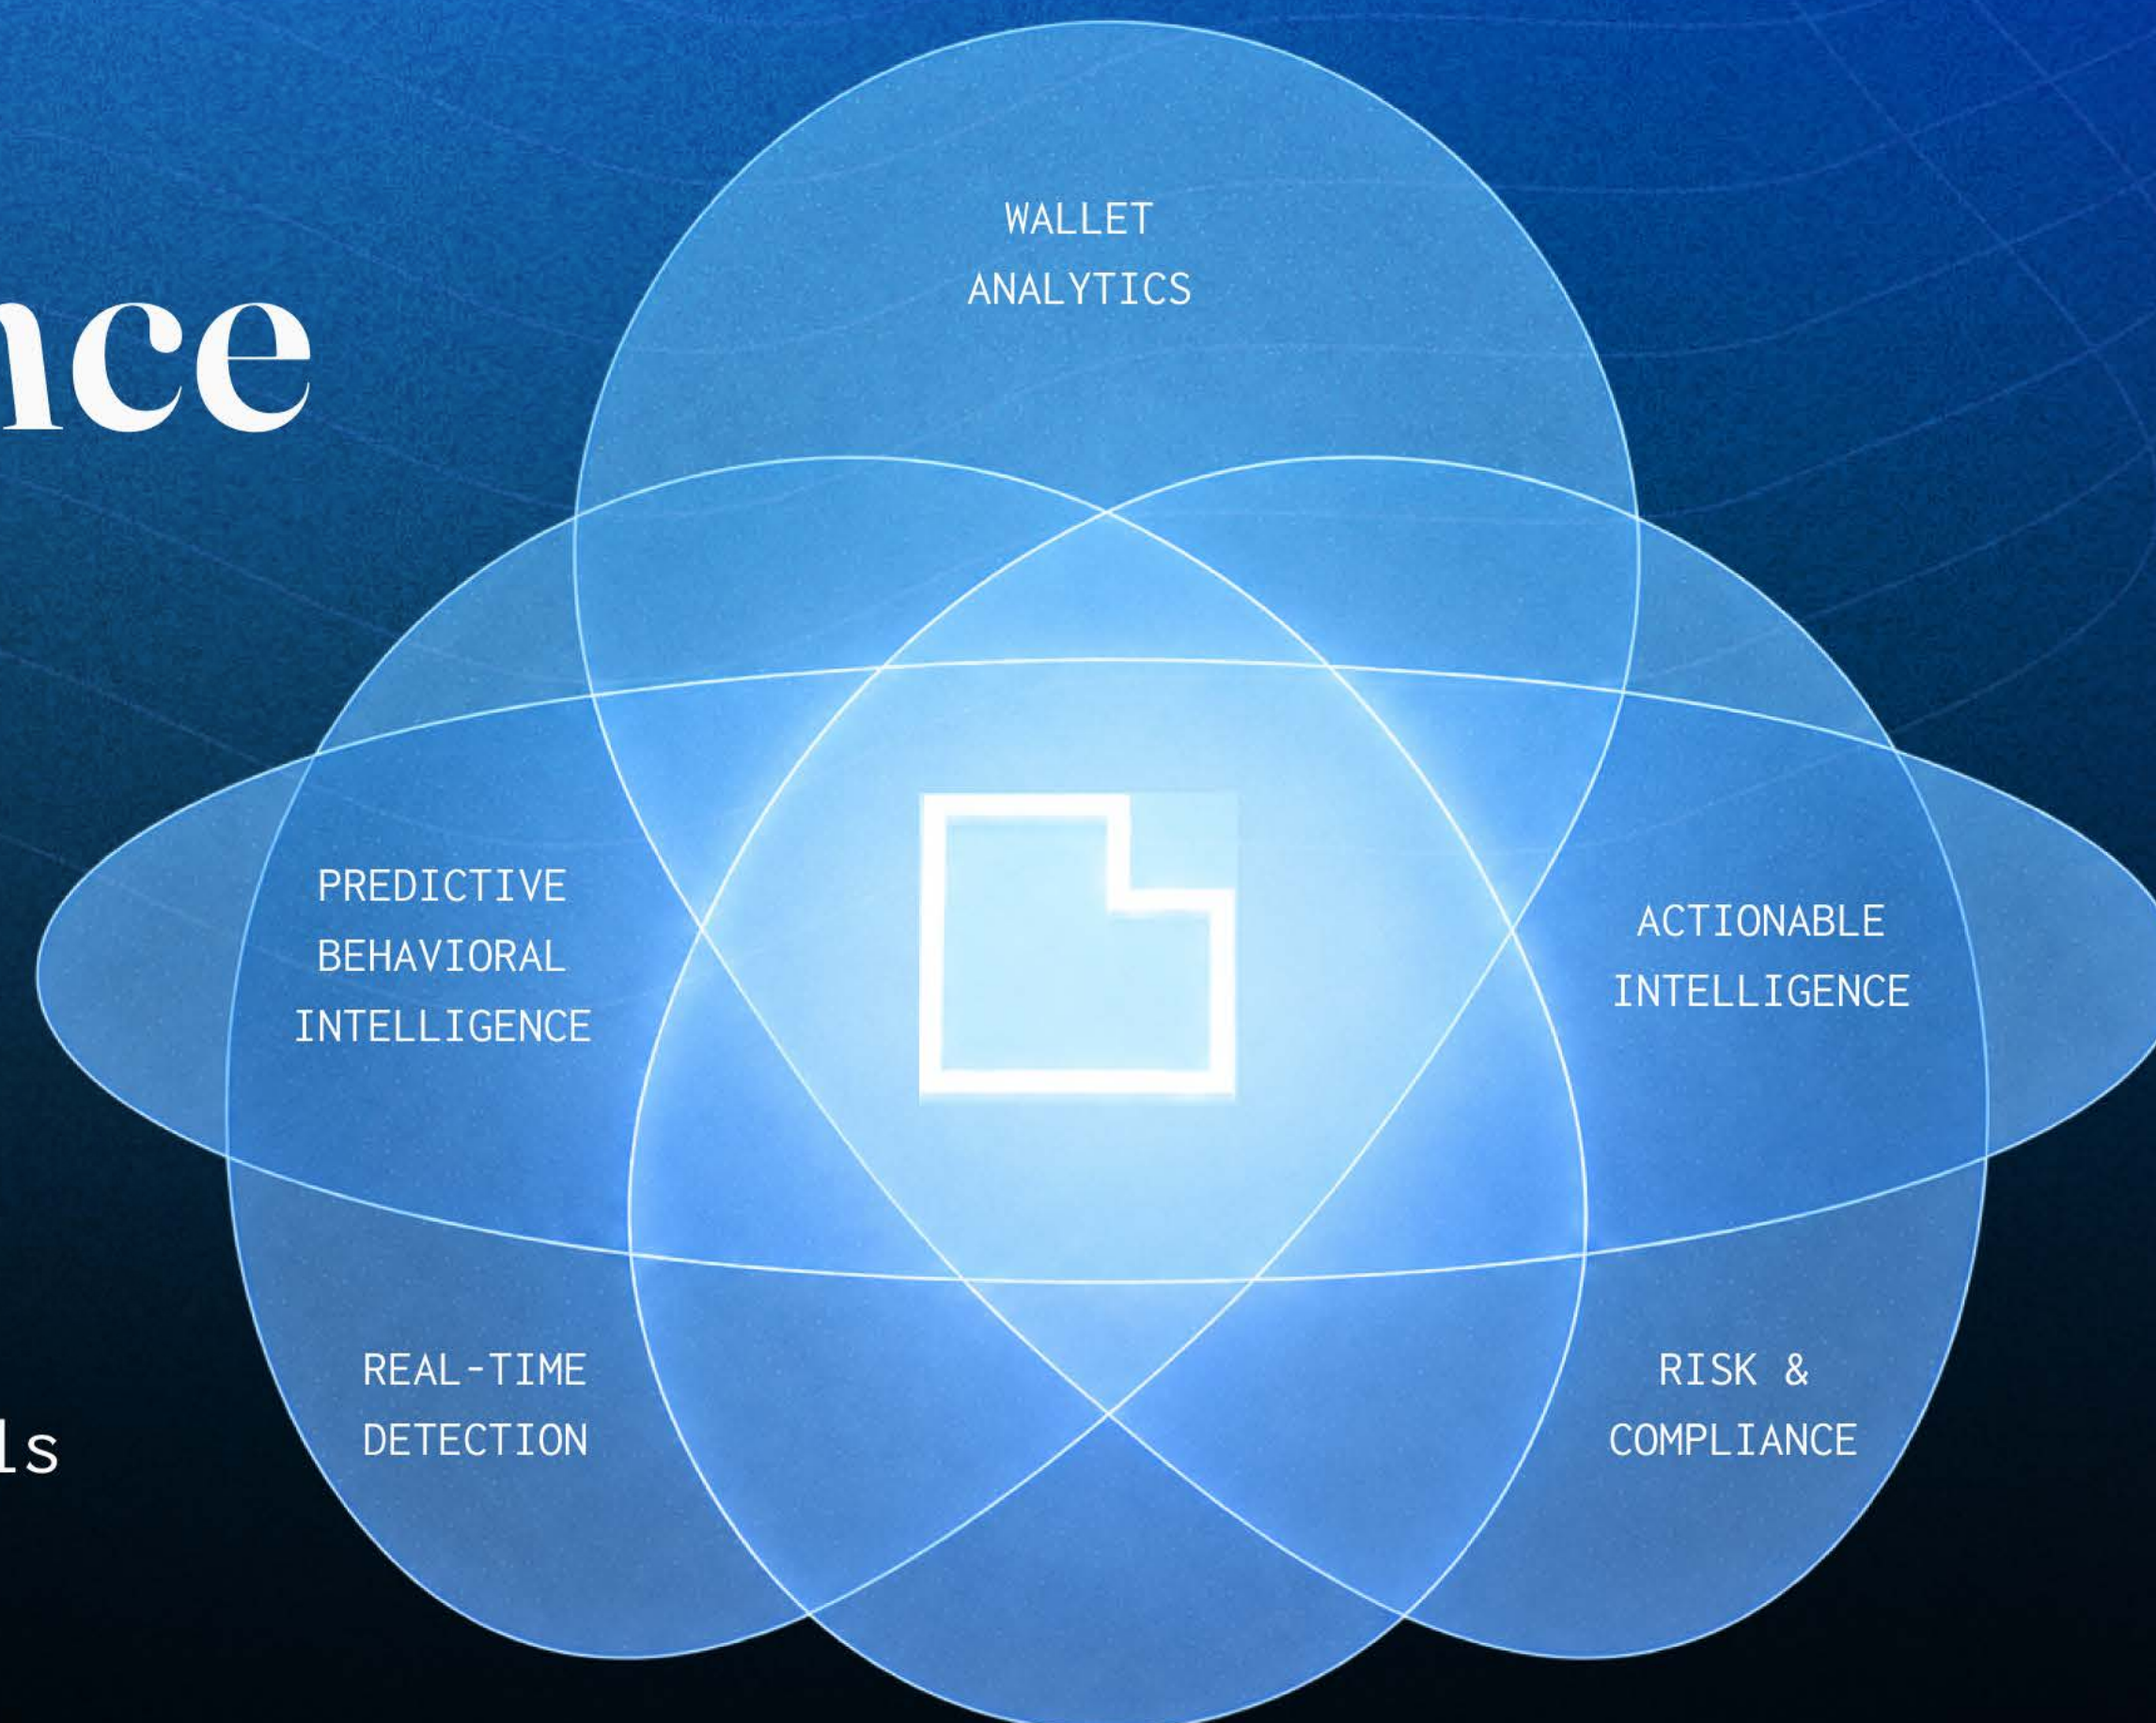

Canton Network Accelerator

— HOW WE COMPARE

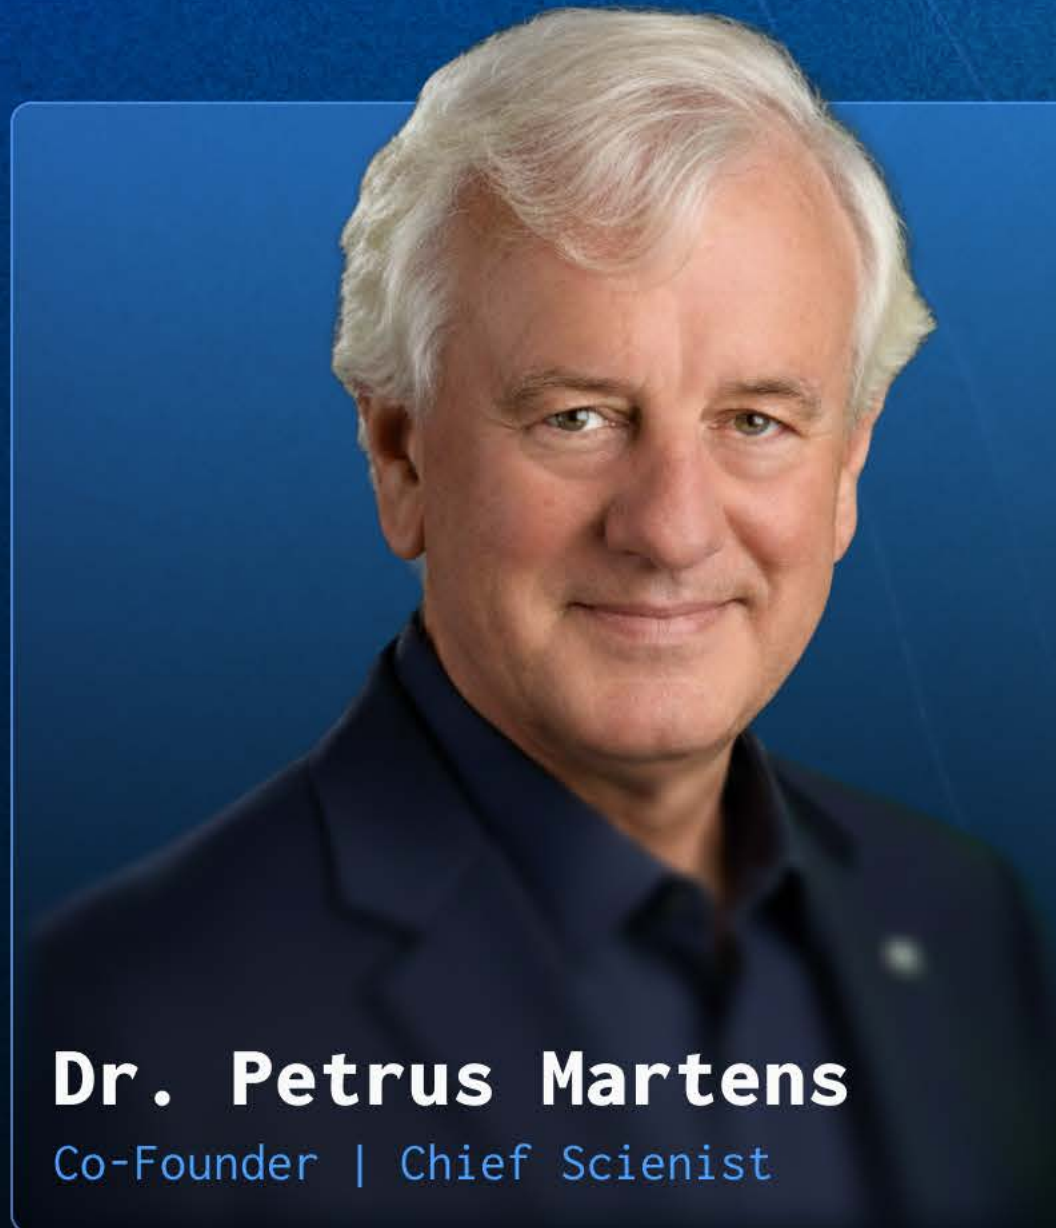

The full intelligence stack. *Extended forward.*

BlockSight combines analytics, detection, and risk intelligence with predictive behavioral models and actionable intelligence.

MEET THE TEAM

Dr. Petrus Martens

Co-Founder | Chief Scientist

Led 30+ years of NASA- and NSF-funded research in machine learning, predictive modeling, and large-scale scientific computing. He is a professor at Georgia State University.

Devon Martens

Co-Founder | CEO

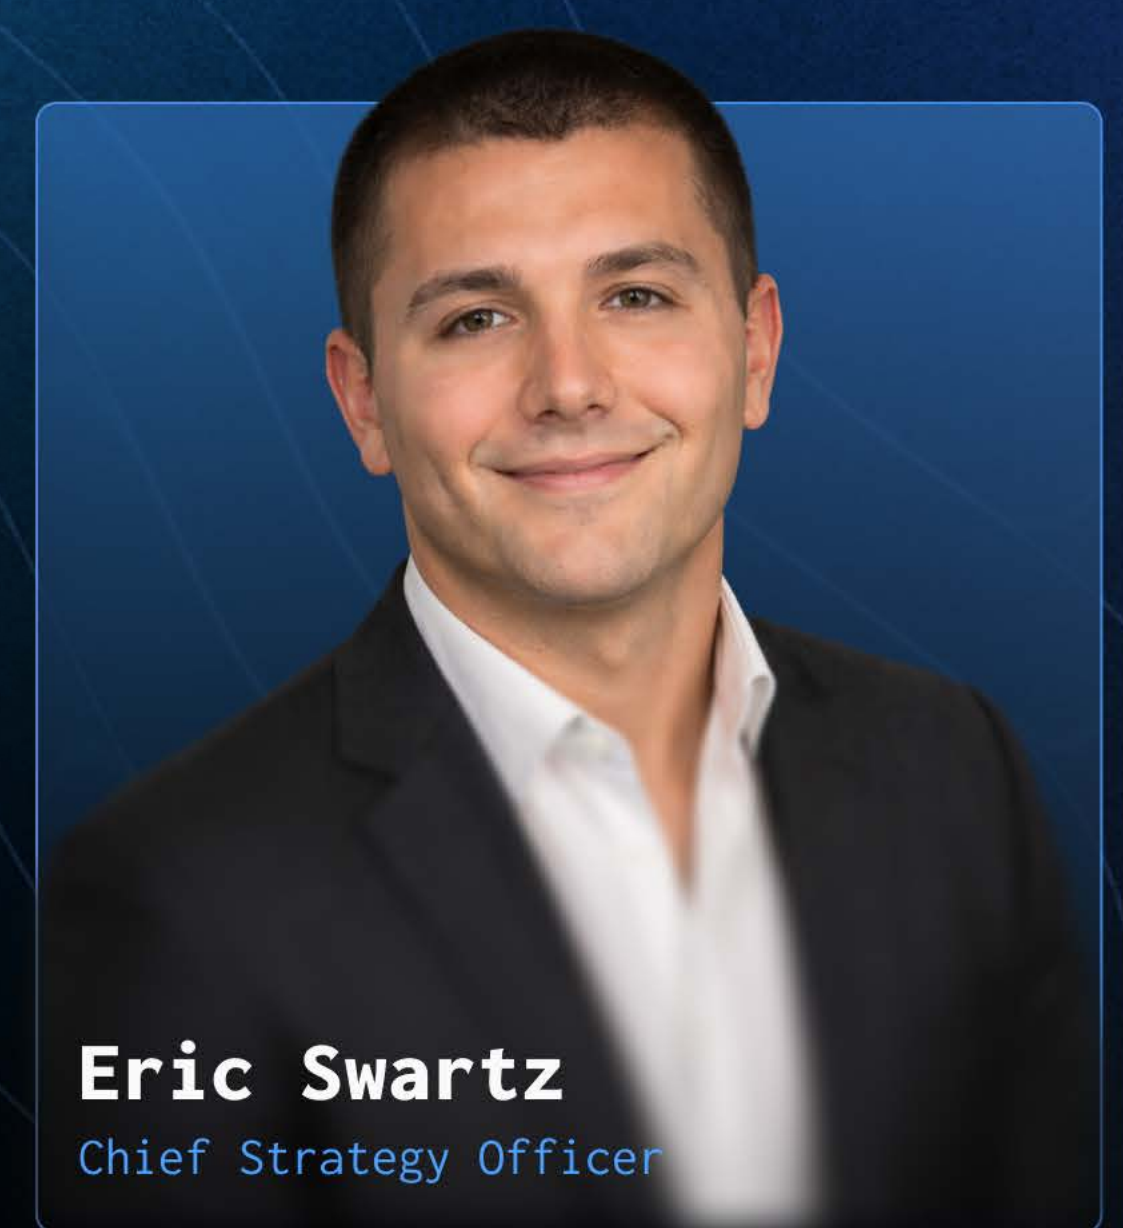

Built AI-driven trading systems managing \$50M+ in liquidity and led Studio Chain, a Layer-2 for game economies. She combines blockchain commerce, machine learning, & decentralized reasoning.

Adam Cottrell

Co-Founder | CTO

20+ years of experience building distributed, real-time systems across aerospace and aviation. He founded Axonara and specializes in AI, networking, RTOS, and production-grade infrastructure.

Eric Swartz

Chief Strategy Officer

Founding General Partner at Panther Hollow Ventures with 12 years across private equity, venture capital, and digital assets. Former General Counsel at Framework Ventures and former attorney at Goodwin and Lowenstein Sandler.

REMAINING ALLOCATION

\$1M

LEAD INVESTOR

USE OF FUNDS - \$1.5M

Fund the build, then scale distribution.

Engineering & Product \$550K

Business Development \$450K

Operations & Contingency \$200K

Legal & Compliance \$150K

Marketing \$150K

Completing the round.

Panther Hollow Ventures is leading the \$1.5M round with a \$500K commitment.

ROUND STATUS

RUNWAY 24 MONTHS

TARGET \$5-15M ARR

Thank you!

Now deploying the
*intelligence layer for
what happens next.*
